

Sea Urchins and Sea Cucumbers: Request for Harvest Data/Information

Article Number: 343 | Rating: Unrated | Last Updated: Thu, Nov 13, 2014 2:53 PM

I'm looking for, and interested in, any information you could direct me to on current laws regarding the harvest of sea urchins and sea cucumbers in Belize. The last time I was down there in 2010, it seemed the government of Belize had legalized the harvest of sea cucumbers. Are sea urchins also a legal harvest? Might you have any idea on the approved numbers/stats allowed to harvest by commercial vessels?

I am not sure on the urchins, here is some info on cucumbers

You could check with the Fisheries Dept,
