

Can you tell me what the Belize City tide differential is for San Pedro?

Article Number: 381 | Rating: Unrated | Last Updated: Wed, Jul 8, 2015 9:45 AM

We are currently in Isla Mujeres on a vessel that has a draft of nearly 6 feet.

=====

The difference will be negligible. Our tides are around a foot at most. A vessel with a 6 foot draft can enter at San Pedro and anchor but would need an experienced guide to go south from San Pedro inside the reef. I wouldn't do it which is why I passed on buying that 48' ketch as the draft was 6'. To go south with a 6' draft by themselves they would need to go out and come back in at English Caye.
