

Do you know anything about private aviation in Belize? I'm planning to move down in the next couple years but hate to give up my small homebuilt.

Didn't see anything like it around AC when I've been there but hoped you might know or know someone that does.

I know of no such restriction. There is an ultralight club at Maya Flats in San Ignacio. San Pedro is crowded and you will need permission from Civil Aviation and Belize Airports Authority in addition to licensing your aircraft. It may be that the licensing of the aircraft is the problem. I don't know if Civil Aviation has anyone with experience in the licensing of your type of plane.
