

Can eating big fish make you sick at some times of the year?

Article Number: 500 | Rating: Unrated | Last Updated: Wed, Aug 2, 2017 4:37 AM

Have always heard to not eat big fish in August, like barracuda and grouper. That was common knowledge when a child. My husband will only eat it in specific seasons because yes...reef fish can really make you sick at the wrong times.

August 1, 2017: PLEASE DON'T EAT ANY BARRACUDA RIGHT NOW WHETHER IT IS BIG OR SMALL! A NUMBER OF US IN CROOKED TREE IS SUFFERING FROM THE TOXINS IN THE FISH!

SYMPTOMS : VOMITING, DIARRHEA, RASH, PAIN IN JOINTS AND MUSCLES, SLEEPLESS NIGHTS... THE RASH IS NO JOKE AT ALL. MOST OF US HAD TO GO TO THE DOCTOR FOR TREATMENT WHICH IS HARDLY HELPING US. THE WORST PART IS THE SYMPTOMS CAN LAST WEEK'S TO MONTHS. I PRAY FOR GOD TO RELEASE US FROM THIS TORTURE WE ARE EXPERIENCING RIGHT NOW!!

PLEASE NOTE : DO NOT EAT BARACUDA RIGHT NOW!!!! PLEASE SHARE WITH YOUR CONTACTS. ..
