

How high and low are the tides?

Article Number: 53 | Rating: Unrated | Last Updated: Mon, Jan 22, 2007 10:12 AM

A tidal range from 6" to 11 is normal, with tides up to 2' during Northers and Spring/Neap tides.

Wave action is normally minimal on the Caye due to the protection of the off shore barrier reef. Click here (<https://ambergriscaye.com/fieldguide/transectc.html>) for information showing the main points of the Outer Reef Lagoon, San Pedro and South, and the main cuts through the reef east of the island.

For more information on tides, click here (<https://ambergriscaye.com/pages/town/tides.html>), or here <http://www02.coconet.com:8080/calendar/year/419.html>
