

Rain and Cave Tubing next week

Marty Casado Tue, Jul 10, 2018 [Caving](#) 0 2769

Curious of current weather forecast and how the current rain conditions will affect cave tubing next week. (July 16-20, 2018).

I assume guides and companies do not take tours out if cave flooding is a possibility?

=====

Hi, you would need to check with the guides where you are doing the tour, you are right, if it rains too much there are no cave tours.

I will say that it is pretty much impossible to guess a week ahead of time...
